

Janardhanarao Burle

Frontend Developer Angular | Flutter

Innovative, creative, and a proven team player with a Tech Degree in Front-end Development and 6 years experience in building, developing, and managing websites, applications, and mobile apps for various organizations. Interested in securing a position of Senior Front-end Developer at an organization, hoping to share great skills, expertise, and experience with the company’s team and valuable clients.

Work Experience

Senior Frontend Developer (Angular)

Qatar Islamic Bank | Tata Consultancy Services Pvt Ltd.

Present

- Developed Pixel Perfect, an Impressive, Customer pleasing UI based on XD/Wireframes provided by Marketing Team.
- Worked on building a Maintainable, Multilingual, Secure, and Extendable Angular Application Base setup for Corporate Internet Banking, as client facing web application using Angular 13, Typescript, Angular Material, Husky, ESLint, prettier, stylelint, etc. Through which developers saved almost 25% time on their deliverables.
- Created reusable Modules, Components, Directives, Pipes, and services to consume API's using Component-based architecture provided by angular.
- Developed Sandbox architecture to decouple the application module-wise and worked on CanLoad & CanActivate Route Guards
- By taking advantage of Content Projection in angular, I Created shared and reusable layout components. Which helps the team to drive the development faster.
- Worked on Centralized Global Error Handler service to handle both Server and client error messages during application Runtime. It helps to avoid handling errors throughout the application unnecessarily.
- Created an Angular Interceptor to set necessary Http headers like jwt token to HttpRequest, to start/stop the loading spinner, and to process the HttpResponse error messages etc.
- Worked on creating Dynamic Components by taking advantage of ViewContainerRef & TemplateRef in Angular, to conditionally render templates during application runtime.
- Created and Integrated Scripts in the package.json for generating SIT, UAT, and Production build packs.
- Created Custom Structural, Attribute directives to render entitlement-based sections of the templates in the application.
- I do validate the implementation of Lifecycle methods, Change Detection strategies, Parent Child components communication, Dependency Injection, and proper usage of the Rxjs library as part of Code Optimisation and PR Code Review.
- Leading the team of 5 Angular Developers and was responsible for Branching/ Version control, Code Optimization, Pull request Code reviewing, Build, and Deployment of the application.

Projects Worked on:

Corporate Internet Banking, Admin Panel Application

Skillset Used:

Angular v13

Oct, 2021

Frontend Developer (Flutter)

Qatar Islamic Bank | Tata Consultancy Services Pvt Ltd.

Sept, 2021

- Worked on the BLOC pattern state management system, which helped to separate Business Logic from UI and to have better codebase maintainability.
- Experienced in implementing Flutter project structure in Dart programming for enterprise-level Flutter applications.
- By gaining a solid understanding of Stateful, Stateless Widgets, and Mobile Development development life cycle, created custom UI components as a library for reusability.
- I have worked on Theming for Android and IOS in both light and dark modes.
- Solid knowledge in Asynchronous programming in Dart / Flutter for working with backend REST-based APIs.
- Experienced in integrating 3rd party flutter libraries like Firebase notifications , google, Huawei maps location, and DIO (A powerful HTTP client for Dart), etc.
- Experience in performance fine-tuning of Flutter applications and in releasing apps to the Diawi store for User Acceptance Testing.
- Cached GET Request calls using Flutter Cache Manager to increase data retrieval performance and used Lottie and SVG packages to provide the best App user experience resulting lag free customer interaction and less Mobile App Size.
- Used localization to enable apps with English and Arabic languages resulting in almost 15% new customers.

Projects Worked on:

QIB Mobile Banking Revamp
QIB Admin Panel Web Application

Skillset Used:

Flutter
Dart
Angular 10
Angular Material
HTML5
SCSS

Oct, 2019

Application Developer - FullStack

Commercial Bank of Dubai | Tata Consultancy Services Pvt Ltd.

Oct 2019

- Experienced in developing front-end components using Object-Oriented JavaScript, HTML5, and CSS3.
- Developed REST APIs using ASP .NET MVC architecture.
- Has a solid understanding of Entity Framework, Routing, and Dependency Injection concepts on .Net.
- Basic understanding of Oracle and MySQL Database
- Integration of user-facing elements developed by front-end developers with server-side logic.
- Developed Web APIs in Node Js using Express Js, JSON Parser, Mongoose plugins to manage data in Mongo DB a NoSql Database.
- Implemented the Field Rework highlighter for better user experience on the rework journey of the customer application.
- Writing reusable, testable, and efficient code with proper documentation.
- Designed and implemented low-latency, high-availability, and performant applications Implementation of security and data protection Integration of data storage solutions.
- Worked on UI Development, Service Integration, and automated testing.

Projects Worked on:

Raffle Draw
Wholesale Credit Application System (CBD - WCAS)
Digital Credit Card Application (DIGITAL CC)

Skillset Used:

ASP .Net, ADO .Net
Angular 4
Node Js
Mongo DB
Express Js
Angular Material

Nov, 2016

Education

Apr, 2016

Bachelor Of Technology

- Branch: Electronics and Communication Engineering (ECE)
- Institute: Lendi Institute Of Technology- Vizianagaram
- University: Jawaharlal Nehru Technological University-Kakinada (JNTU-Kakinada)
- Percentage: 80.07%
- Main coursework: Data Structures and Algorithms, Computer Architecture, Analog & Digital communications, VLSI, Digital communications etc
- Project:
 - Project Name: : Android Controlled Home Appliances system
 - Software/Hardware Used: : MIT App Inventor, Arduino Uno, Bluetooth Module, GSM Module etc.
 - Developed an efficient Module to be able to communicate Cellular and Bluetoothly by receiving the instructions from Andoid application which is developed using MIT App Inventor.
